Working current:	max. 50 mA
Memory:	30 remote controls

Dumb China Receiver?
This receiver programs
all 4 buttons in at once
and you have to wire
separately each rely
function

Works with:

Beninca, BFT Mitto, CAME Space, DEA Mio, DTM, FAAC
Fix, FAAC Lc, Hato, NICE Smilo, Normstahl, Wiśniowski.

Hold the Learn button for at least 3 seconds before the light comes on

Learning a code

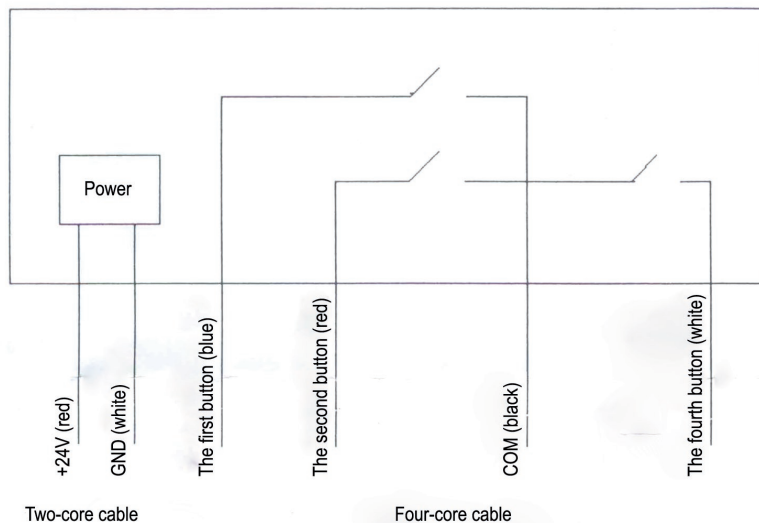

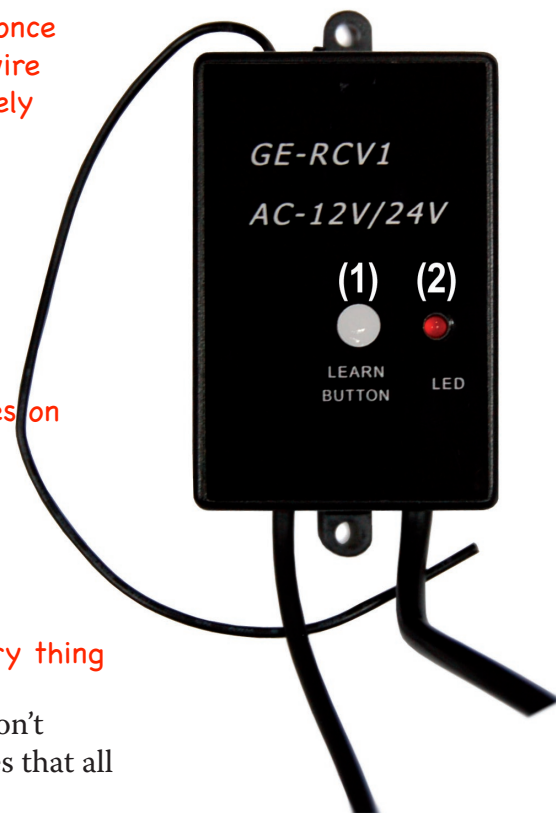

Press and hold learning button (1), when the red LED light (2) is on,
release learning button (1), then press any keys of the remote twice.
The LED light (2) is off and then flashes - indicates that the code is
learned successfully. Repeat this process to learn the second code.

Hold the Learn button for at least 10 seconds for it to erase every thing

Deleting existing codes

Press and hold the learning button (1), the red LED light (2) is on, don't
release this button (1) until the red LED light (2) is off - this indicates that all
the codes have been deleted.

Instruction

Reference to the following **wiring diagram**:

3 channel relay correspond the first,
the second and the fourth button of the
remote.
